## Curriculum Vitae

Mr. Kratovil is a Director in the Washington, DC office of Credibility International. With twenty years of experience in finance and valuation and thirteen years of experience in damage quantification and complex financial modeling, Kenneth has assisted clients across a range of industries.

Mr. Kratovil provides accounting, economic and financial consulting services as they relate to litigation and dispute resolution for companies and government entities. Kenneth has analyzed profits, costs, cash flows, market trends, valuations, and regulations for international arbitration including contract and investment treaty cases as well as in litigation.

Prior to joining Credibility International, Kenneth was a member of the Dispute and Investigation practices of Alvarez & Marsal and Huron Consulting. Prior to that, he was with the Securities and Exchange Commission in the Office of the Chief Accountant and also with Lehman Brothers within the Fixed Income product control group. Representative examples of Kenneth's engagement experience include:

Comisión Ejecutiva Hidroeléctrica Del Río Lempa; Breach of Contract; International arbitration conducted under the rules of the UN Commission on International Trade Law on dispute relating to a power purchase agreement in El Salvador. (Firm engaged by respondent; parties from US & El Salvador)

### Consulting Experience

- Performed independent price verification testing for the implementation of ASC 820, Fair Value Measurements, for a large broker dealer. The client had operations around the world with a mix of financial products and commodities including Fixed Income, Metals, Energy, Agriculture and FX. Corroborated prices and inputs for models with other market sources including (1) utilizing acceptable pricing services and evaluating trade history for each product, (2) developing acceptable price quote tolerances/ranges for products, and (3) determining whether prices were within a range to support the reasonableness of the fair value estimate.
- Valuation of a minority interest in a small privately held construction company. The minority owner was being forced out and was involuntarily deprived of property. Calculated the fair value and assisted with expert report on the opinion of value.

- Assisted multiple companies in voluntary reviews of their employee stock based compensation grants to determine the potential of any unrecorded stock based compensation cost. Reviewed over 700 grants, related exercises, and re-prices. Built variable option models under ASC 718 and provided income statement and/or balance sheet adjustments for non-routine grants under the intrinsic value method utilizing multiple transaction dates and vesting schedules.
- Reviewed and tested models used to derive the fair value for reporting purpose of natural gas contracts purchased by a manufacturing company for the operations of their business. Extracted forward prices on liquid contracts and calculated the spread on the client owned positions and then calculated specific period discount factors through construction of swap rate curve versus clients' historical fixed 12-month rate.
- Provided valuation scenario analysis on NAV calculation to client involved in financial dispute with the money market fund that "broke the buck." Calculated variances between pro-rata and preferred distributions, created a broker quote analysis of bond prices, and created an analysis of non-indicative pricing and volume prior to the bankruptcy filing.

#### **Education and professional certifications**
